III. CURRENT EVENTS

Cross-border accelerator program Dubai

- SPS wants to connect Slovenian companies with an emphasis on start-ups operating in the high-tech sector with potential partners, buyers and investors of the international innovation ecosystem in Dubai.
- provide knowledge and information that would provide adequate support for a breakthrough in phases where most start-ups fail, such as business and market validation, initial acquisition of customers and investors, and business development and expansion to the global market.

Cross-border accelerator program USA

- SPS wants to improve the knowledge, skills and competences of portfolio companies about operations on the US market (e.g. expansion strategy formulation, sales and marketing, entry financing, legal matters).
- Investment readiness for American investors and strategic partners (e.g. in the field of capital market analysis, communication, pitching and storytelling).
- networking of portfolio companies with key stakeholders from the American start-up ecosystem (investors, corporations, accelerators, etc.)

"In the month of January 2023, we already approved

165 crisis liquidity loans

In the amount EUR **13,3 m** - tender P7CE 2022"

II. WE SUPPORT SUSTAINABLE PROJECTS

COSYLAB D.O.O.

An extremely important sustainable aspect of Cosylab operations is investing in areas that are strategically important for the development of humanity like future energies (fusion) and the control of cancer, one of the most common human diseases today. We are proud that, as a global company, we can work from Slovenia all over the world and thereby also nurture multiculturalism. We are technologically exceptional, but we are aware that behind technological excellence and progress there are always people, so we always put good relations and the well-being of our employees first.."

LUMAR INŽENIRING D.O.O.

"At Lumar, we recognize sustainability as one of the key building blocks that has written our business story since our beginnings. We have proven many times in the past with pioneering and pilot projects that sustainability drives our innovation. However, sustainability is not a principle that ennobles only our production program, it is the way we live and develop. This is also reflected in our facilities, with which the company has established itself as the most innovative and successful Slovenian company among manufacturers of prefabricated buildings."
